

Arif Ashraf

Bengaluru, Karnataka | arif18052@gmail.com | +91 9797012112 | LinkedIn | GitHub | Portfolio

Summary

Software Engineer focused on architecting scalable backends and high-performance REST APIs. Proficient in Java, Spring Boot, and Django, driving features through Agile cycles. Dedicated to optimizing complex systems and writing clean, reliable code.

Education

SEA College of Engineering and Technology (SEACET), Bengaluru	2022 – 2026
BE in Computer Science and Engineering	CGPA: 8.6/10

Skills

Languages: Java, Python, C++

Frameworks & Backend: Spring Boot, Django, JWT, WebSocket, REST APIs, React

Databases: PostgreSQL, MySQL, MongoDB

Web Technologies: HTML, CSS, JavaScript

Tools & Platforms: Git, GitHub, GitHub Actions, AWS EC2, Nginx

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Experience

Netpy Technologies | Software Developer Intern Oct 2025 – Present

- Engineered Django backend services and 15+ REST APIs for a cloud e-commerce platform's core order and catalog workflows.
- Implemented OTP authentication using Django REST Framework, strengthening account security for customer onboarding.
- Reduced API latency by 25% by optimizing PostgreSQL inventory and transaction queries using Django ORM.

Projects

DPI Engine | Deep Packet Inspection System

[GitHub](#)

C++ | Networking | PCAP Parsing | Multithreading | TLS

- Engineered a C++ DPI system to parse raw PCAP captures and implemented custom parsers for Ethernet, IPv4, TCP, and UDP.
- Extracted TLS SNI for domain-level identification and developed a rule engine enforcing IP, application, and domain blocks.
- Designed a multithreaded processing pipeline using thread-safe queues for high-performance traffic analysis.

Real-Time Chat Application

[GitHub](#) | [Live](#)

Java | Spring Boot | WebSocket | REST APIs

- Engineered a real-time chat backend using Java, Spring Boot, and WebSockets for sub-second bidirectional communication.
- Developed 10+ REST APIs for user authentication, chat rooms, and message persistence.
- Supported 50+ concurrent users with stable real-time message delivery during functional testing.

Client Project | Gill Organics

[Website](#)

Django | E-commerce Backend | REST APIs

- Contributed to Django e-commerce backend development, engineering robust modules for product catalogs, authentication, and orders.
- Developed 12+ Django REST APIs that streamlined product catalog and order workflows, reducing manual processing by enabling end-to-end automation.
- Optimized inventory and transaction database queries to accelerate response times and deployed multiple production releases.

Achievements

- 2nd Prize | College Hackathon (Innovation Category)
- Solved 200+ Data Structures Algorithms problems in Java and C++, strengthening problem-solving skills.
- TCS TechBytes Semifinalist | National-level technical competition focused on problem-solving and aptitude.
- Selected for Inter-College Round of SAP Labs NEXTGRID Hackfest
